

LSVB Sealed Vapor

Achieving the Seal of Approval for Wet and Dusty Environments

Visoneering's LSVB features a robust design, ideal for use in environments vulnerable to moisture or dust. The rugged impact-resistant polycarbonate housing and frosted lens are UV-stabilized and fastened with 304 stainless steel latches. The LED tray is tethered and captive to the lens, making it easy to install and service on-site. The LSVB's wet location and IP66 rating make it a great solution for parking garages, warehouses, stairwells, cold storage, and much more.

Applications:

- Canopies
- Cold Storage Facilities
- Garage and Workshops
- Dusty and Wet Environments

Featured Options:

- Internal/External Occupancy Motion Sensors
- Low Temperature (-40°C)

Features:

- 1 UV Stabilized Polycarbonate Diffuser
- 2 5VA Material (Highest Frame Rating)
- 3 Stainless Steel Latches (Standard)
- 4 Delivers up to 150 lm/W

Additional Features:

- Up to 14,000 lumens
- IK10 Impact rating
- Stainless steel surface mounting brackets
- Tamper resistant hardware provided

Available Sizes:

- 2', 4' and 8' Lengths
