**Product Description**

The MSUi-DFX series provides a UVA source from an inset door luminaire to provide a simple and effective way of adding surface disinfection to surgical suites. It also has advanced cleanroom features for supplemental lighting of the surgical/operating room. It offers symmetric or asymmetric distributions when located above the surgical table perimeter. It is certified dust-tight and water resistant to IP65 for frequent rigorous cleaning practices. MSUi is Mil-Std-461G certified and designed for recessed mounting in surgical ceiling systems and grid and flanged installations. The MSUi-DFX featuring Leviton's WavePort™ technology harnesses the power of 365DisInFx to kill bacteria while delivering superior white light.

**Featured Options**

- Integral Emergency Packs
- 90 CRI LEDs

**Housing**

Precision formed, seam welded, one-piece, hole-free construction. 20 gauge cold rolled steel standard. Rigid 18 gauge flange with welded and rounded corners for safety. Gasketed and cable hinged access panel in rear surface of housing.

**Door Frame**

Inset one-piece door frame, fabricated from 18 gauge, cold rolled steel with TIG welded corners. Countersunk flat head, stainless steel, captive fasteners with integral silicone o-rings. Door frame is removable, reversible, and hinged by stainless steel aircraft cables. High performance silicone gasket seals door frame to housing.

**Lens & Lens Retention**

Each aperture contains a high diffusion 0.125" thick acrylic lens that provides a symmetric distribution. UVA transmissive and resistant materials used in DFX aperture. Smooth external surface for easy cleaning. Each lens is secured continuously along their perimeter with steel rails. Asymmetric acrylic distributions are optional. Radiated emissions (RE101) mitigated below Mil-Std-461G limits by use of special filters and secondary circuit design elements. (This makes a metalized RFI grid no longer necessary.) Other lens options available. Lens sealed to door frame with silicone sealant.

**Gasket Systems**

Triple gasketed: Lens: RTV 100% pure silicone seals lens to door. Door: High performance Poron™ gasket seals door frame to housing. Housing: Closed cell neoprene gasket provided to seal flange to ceiling. Door screws: Silicone o-rings with special sealing flat-head screws.

**LED**

LED board modules are high efficiency and closely regulated to maintain CRI, color consistency, lumen performance, and efficacy. Select from 3000K, 3500K, 4000K, and 5000K color temperatures with a color consistency of 3 SDCM, standard 80 CRI, optional 90 CRI. Lifetime L70 is greater than 60,000 hrs. Modules are field replaceable and commercially available.

**UVA Light Engine**

365nm UVA LED board modules are proprietary and designed for long life and continuous operation. These non-dimming drivers are factory programmed for proper output and continuous operation and are separately circuited from the visible light engine. Modules are field replaceable. UVA output is certified to risk group zero based on safety testing according to IEC 62471 and UL standards.

**Electrical**

The standard electronic driver is constant current, programmable and dimmable to 1%<sup>1</sup> using a 0-10V protocol. High efficiency (>85%) and low THD (<10%). Certified to Mil-Std-461G for conducted emissions as well as FCC Part 15. 120-277Vac or 347Vac, 50/60hz. See "Options" for Lutron™ or DALI driver choices. Internal Emergency Drivers are serviceable from the room side<sup>2</sup>.

**Finish**

5 Stage pretreatment and gloss white polyester powder coated after fabrication. ASTM B117 1000hr Salt Spray tested. Stainless Steel is available with a choice of brushed #4 polished finish or gloss white polyester powder coated.

**Installation**

Flange installation is supported by swing style mounting brackets. Grid installation suitable for 1" and 1.5" T-Bar NEMA LE4 Type G ceilings. See ordering key for use with 2" T-Bar Grid systems. (option C57) Consult factory for compatibility with non-standard grid systems). Ambient operating temperature: -4°F (-20°C) to 104°F (40°C).

**Safety**

Safety: 24-hour dosage is designed to operate below human health exposure limits per IEC 62471 Photobiological Safety for Lamps and Lamp Systems standard and American Conference of Governmental Industrial Hygienists (ACGIH®) TLVs® guidelines. This fixture has assigned to Risk Group 0 (Zero) per this standard. \*Risk Group 0 (Zero) is the lowest test group and requires no special warnings or cautions. See the Application Guide for proper installation and use. UVA emitted from this product. Install in compliance with manufacturer instructions to prevent risk of personal injury from UV radiation.

**Listings, Certifications and Ratings**

UL listed ANSI/UL1598 for wet locations under covered ceiling. Recessed Type IC for insulated ceilings. UL Listed UL8802 Germicidal Systems, IEC60598 IP65 Certified. Mil-Std-461G certified. Cleanroom classified ISO3-8. EPA # xxxxx-xx-x

**Warranty**

5 year limited warranty. For complete warranty,

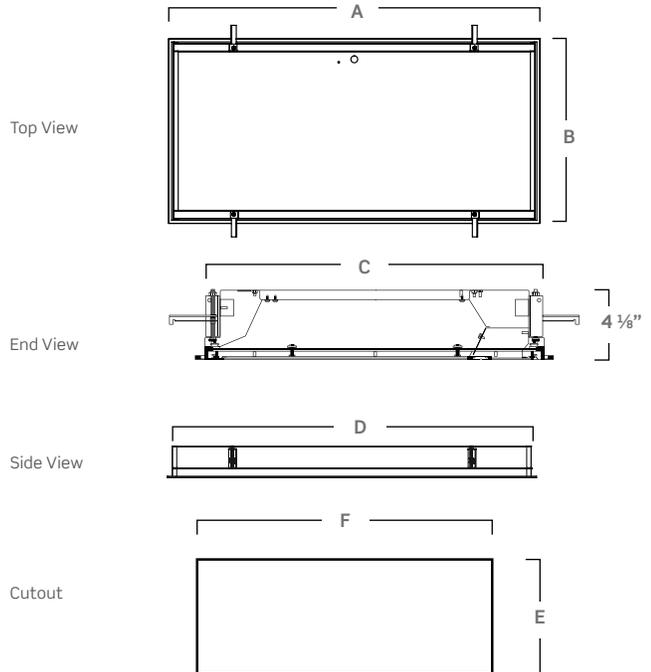

**Approvals**

- Certified IP65 & Certified NSF2.
- Cleanroom class ISO3.

**Dimensions**

**Test Results**

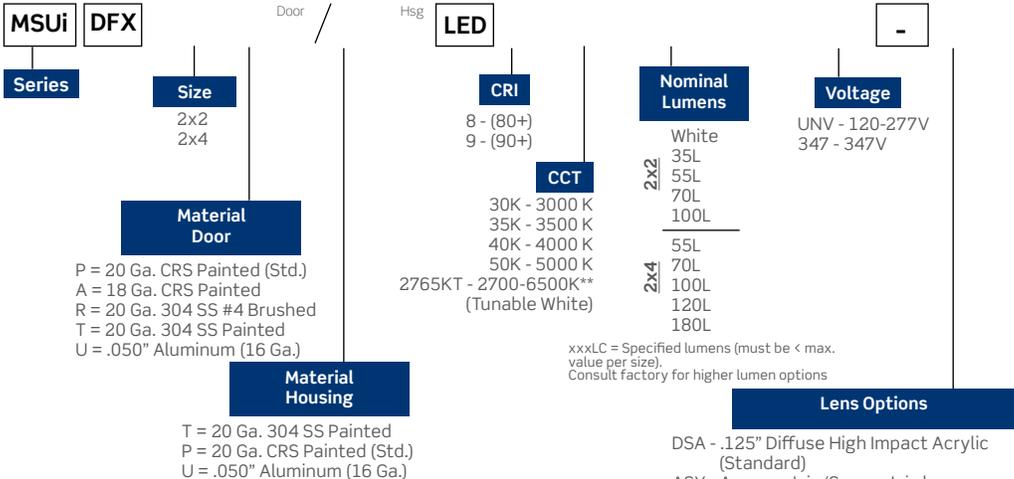

365DisInFx™ UVA disinfection technology was tested using in-vitro methods (as described in Livingston, Kvam<sup>1,2</sup>) which resulted in 99.7% reduction in MRSA on surfaces exposed to 3W/m2 of 365nm UVA over a single 8-hour period. Results of this testing also showed significant reduction over a similar exposure period of certain common pathogens including Staphylococcus aureus, Enterococcus faecalis, Escherichia coli, Acinetobacter baumannii, Pseudomonas aeruginosa, Candida albicans and auris, associated with Hospital Acquired Infections (HAIs). Photobiological science and mathematical modeling enables us to calculate expected inactivation rates for 24-hour continuous operation of the 365DisInFx™ UVA technology

**Order Key**

**EXAMPLE: MSUi-DFX2x4A/PLED840K100LUNV-DSA**

- Options**
- Driver Options**
- B02 Dimming Addressable Digital (DALI)
  - B39 Emergency Bat. Pack - LED 10 Watts\*
  - B39(ST) Emergency Bat. Pack, Self-Testing - LED 10 Watts\*
  - V33 Two Circuit Switching (Add V25, below, if desired)
- Housing Construction Options**
- C57 Housing for 2" T-Bar (Consult factory for compatibility)
  - C106 Silicone Free Construction
- Finish Options**
- F06 Standard Gloss White (Not Antimicrobial)
  - C77 Color Matched Stainless Door Screws
- Wiring Options**
- V25 Radio Frequency Filter
  - V55 Sealed wireway
  - V126 Deduct RF Filtering

- Accessories**
- M70 Install Frame, (Typ. for wet plaster ceilings)
  - M46 Continuous Row Mtg. - Not Required for Grid

\* Standard emergency battery pack options are internal and serviced from the room side. The exception is for some 2x2 wattages may have remote battery packs. Consult factory for details regarding 2x2 with emergency pack options.

\*\* When Selecting 2765KT, if a tunable white compatible control is not selected the luminaire will come standard with two sets of 0-10V wires for dimming and color tuning. For compatible control options please consult factory.

**Make An Informed Decision**

- UV radiation can pose a risk of personal injury. Overexposure can result in damage to the eyes and bare skin. To reduce the risk of overexposure, equipment must be installed following the manufacturer's site planning and application recommendations, including minimum ceiling height restrictions.
- UV solutions are intended for common high traffic spaces and not recommended for dwellings or home use.
- Installation of the devices should be performed by qualified professionals as detailed in the MSUi-DFX installation guide.
- To allow for occupancy during use, this fixture complies with IEC 62471 – Photobiological Safety of Lamps and Lamp Systems standards and American Conference of Governmental Industrial Hygienists (ACGIH®) TLVs® guidelines when installed as directed.
- Certolux's UV products are meant to be used in conjunction with other protective measures like manual cleaning and the use of proper PPE. They are not a substitute for other measures.
- Certolux products are not intended to be used as a medical device.
- If combining two or more UV solutions, whether from Certolux / Viscor, a Leviton company and/or other manufacturers, please consult a trained product application representative to ensure the total irradiance (UV dose) does not exceed recommended human exposure limits. To the extent UV solutions are combined, it may impact inactivation rates.
